EXPERIENCE

PURPLE TECHNO SOLUTIONS | BACKEND ENGINEERING INTERN

June 2025 – July 2025 | Remote

- Built and optimized backend REST APIs with Node.js and Express, cutting API response times by 25% using database indexing and async requests.
- Created an AI Prompt Navigator with Google Cloud Vertex AI, making prompt suggestions 40% more accurate for users in an Agile team setup.
- Tested and validated API endpoints using Postman and Git, which improved overall system reliability by 15%.

PROJECTS

HOTEL GUEST SENTIMENT DASHBOARD | NLP ANALYTICS PIPELINE

FastAPI, Python, PostgreSQL, Docker, HuggingFace, SQLAlchemy

- Built a full-stack review analytics platform using FastAPI and PostgreSQL with SQLAlchemy to manage user data securely.
- Created a background data worker with FastAPI BackgroundTasks to process large CSV files in batches without slowing down the application.
- Integrated a hybrid NLP model using DistilBERT and NLTK to accurately analyze customer sentiment across 6 hotel categories.

UNIRIDE | CAMPUS RIDE SHARING APP

React Native, TypeScript, Node.js, PostgreSQL, WebSockets

- Developed a cross-platform mobile app using React Native, TypeScript, and PostgreSQL to make campus ride-sharing easy for students.
- Implemented real-time tracking with WebSockets to keep location updates smooth and delay under 200 milliseconds during busy hours.
- Designed scalable database schemas and automated driver assignment using Supabase and Mapbox API for uninterrupted service.

SRM SPORTS COUNCIL PLATFORM | EVENT MANAGEMENT SYSTEM

Node.js, Express.js, MongoDB, REST APIs, SWR Caching, React.js

- Built an event management platform using Node.js and MongoDB with Role-Based Access Control (RBAC) to handle different user permissions safely.
- Used SWR caching on the frontend to store frequent data, cutting unnecessary database requests by 35% and speeding up page loads.
- Tested REST APIs thoroughly using Postman and managed code with Git to keep the platform stable during high-traffic campus bookings.

EDUCATION

SRM UNIVERSITY AP

B.TECH IN COMPUTER SCIENCE

Expected Graduation: June 2027

CGPA: 8.21 / 10.0

BOARD OF SECONDARY ED.

CLASS XII

Graduated: May 2023 | 92.5%

SKILLS

LANGUAGES

- Java (SE 17) • Python • C++
- TypeScript • JavaScript • SQL

BACKEND & SYSTEMS

- FastAPI • Node.js • Express.js
- Flask • REST APIs • WebSockets
- Microservices • Docker Compose

DATABASES & CLOUD

- PostgreSQL • MongoDB • MySQL
- Supabase • Redis • SQLAlchemy
- Vercel • Render • AWS / GCP

CORE COMPUTER SCIENCE

- Data Structures & Algorithms (DSA)
- Object-Oriented Design (OOD/OOP)
- Operating Systems • DBMS • SDLC

CERTIFICATIONS

• Oracle Certified Professional

Java SE 17 Developer (OOP, Multithreading, Concurrency)

• Google Cloud Vertex AI

Prompt Design & Multimodal Systems
